

Q-Training

PRODUCT TRAINING FOR Q-COMPLIANCE AND Q-AUDIT

Empower Your Team to Use the Best-in-Class Compliance and Audit Solutions

Qmulos is the leading cybersecurity compliance and audit automation company with our Q-Compliance and Q-Audit products. As with any transformational solution, proper training for your staff is required to effectively use Q-Compliance and Q-Audit to realize all the benefits of compliance and audit automation, continuous monitoring, and improve your security posture. Whether you're a customer that has already invested in our products, a partner who will be doing installations for our joint customers or are just interested in learning more about how to use our products, Q-Training has a course that can suit your needs. Taught by Qmulos' security and certified Splunk experts, our courses combine concepts and hands-on labs that are tailored to the roles and responsibilities of different types of users. We focus our time on the tasks required to use, manage, install, and customize Q-Compliance and Q-Audit—keeping your employee's out-of-office time to a minimum and adding value in every possible way.

Q-Training Curriculum

Qmulos currently offers the following courses for our Q-Compliance and Q-Audit products.

Q-Compliance		Q-Audit	
Course	Target Audience	Course	Target Audience
Q-Compliance End User Training	<ul style="list-style-type: none"> • Chief information/security officers (CIO/CISO) • Information system security managers (ISSM) • Information system security officers (ISSO) • Control assessors/auditors • Security engineers • Splunk administrators 	Q-Audit End User Training	<ul style="list-style-type: none"> • Information system security managers (ISSM) • Information system security officers (ISSO) • Control assessors/auditors • Security engineers • Splunk administrators
Q-Compliance Deployment Training	<ul style="list-style-type: none"> • Security engineers • Splunk administrators 	Q-Audit Deployment Training	<ul style="list-style-type: none"> • Security engineers • Splunk administrators
Q-Compliance Capstone Project	<ul style="list-style-type: none"> • Security engineers • Splunk administrators 	Q-Audit Capstone Project	<ul style="list-style-type: none"> • Security engineers • Splunk administrators

Q-Compliance End User Training

The End User Training takes one business day to complete and consists of training slides and several hands-on labs to be completed in an AWS environment. The class walks through building out baselines and assets, defining organizations and systems, configuring controls and creating executive dashboards, collecting and alerting on evidence and daily system priorities are all covered in depth. This workshop is designed for end users of the Q-Compliance app (e.g., program managers, system managers, etc.) to ensure a solid understanding of how the application works, including its features and functionality.

Q-Compliance Deployment Training

The Q-Compliance Deployment Training walks attendees through deploying, installing, and configuring the application. Over the course of two days attendees will master the creation of custom controls and visualizations, configuring, ingestion, and mapping data to any framework needed. Furthermore, this training assumes your understanding of several Splunk skills. Without these skills, some additional lift may be required to read up on those areas as needed. Links to supporting Splunk documentation and other resources are provided throughout the slides as a way of supplementing any knowledge gaps.

Q-Training

PRODUCT TRAINING FOR Q-COMPLIANCE AND Q-AUDIT

Q-Compliance Capstone Project

The Q-Compliance Capstone Project is a self-paced exercise in which students apply everything they've learned from the Q-Compliance End User Training and Q-Compliance Deployment Training. The project tests the student's ability to install, configure, map and demonstrate the Q-Compliance application from start to finish. The objective of the Q-Compliance Capstone Project is to create a real-world environment to add confidence and test the student to ensure mastery of the material. Upon successful completion of the Q-Compliance Capstone Project, students become Qmulos certified installers of Q-Compliance.

Q-Audit End User Training

The Q-Audit End User Training is a half-day course that introduces students to the ICS 500-27 standard that is the foundation for the Q-Audit application, walks through all the features and functionality of the dashboards in Q-Audit, and explains how they support the auditing requirements of the standard. The course ends with three hands-on lab exercises that demonstrate how users can use the audit and investigative capabilities of Q-Audit to respond to different security scenarios in an organization.

Q-Audit Deployment Training

The Q-Audit Deployment Training is a one-day course that prepares students for installing and configuring the Q-Audit application in their organization. It explains the required data sources and corresponding data models to populate Q-Audit; how to configure and onboard the two primary data sources - Linux and Windows audit logs; how to install Q-Audit and supporting technical add-ons in Splunk; how to configure Q-Audit and verify that the installation is correct. Students are provisioned with their own virtual machines, work through all the exercises, and finish the course with a fully functional instance of Q-Audit.

Q-Audit Capstone Project

The Q-Audit Capstone Project is a self-paced exercise in which students apply everything they've learned from the Q-Audit End User Training and Q-Audit Deployment Training to install, configure, and demonstrate the Q-Audit application from scratch. The objective of the Q-Audit Capstone Project is to test the skills and knowledge of the student to ensure mastery of the material. Upon successful completion of the Q-Audit Capstone Project, students become Qmulos certified installers of Q-Audit.
